

VorTex™ Backlit Precision T130 is a polyester fabric ideal for use with retail applications. The product is designed and coated to hold a high resolution and wide color gamut. VorTex™ Backlit Precision T130 was engineered with a unique coating that prevents color distortion due to cracking if the fabric is creased. The print surface allows for rich and uniform saturation resulting in vivid back-lit graphics through transfer dye-sublimation printing. VorTex™ Backlit Precision T130 is available in widths of 63" and 126".
